WORK EXPERIENCE

CTO | Co-Founder

ThirteenIO · 2026 - Current

Laid out the vision for the company
Authored, white boarded, and schematized all apps
Curates all websites
Generates analytics reports for company review

Senior Web Developer

Future Brands · 2021 - 2021

Achieved 100% front-to-back UX design and Web Development covering all aspects of website production.
Implemented Wireframing using Adobe XD to effectively design and develop websites.
Executed eCommerce implementation accompanied by comprehensive reporting.
Managed CMS Solution design and administration to ensure both efficiency and productivity.
Generated analytics reports to improve website performance and track user behavior.

Business Owner

Eduardo Colmenares Web Development - 2010 - 2026

Complete web builds start to finish.
Consulting - both for maintenance and web security.
Helped with choosing the best registrar and hosting for the build, handled all email setups.
Created logos and other related images.

Business Owner

Iron Wall Malware Removal · 2017 - 2021

Led website malware removal efforts to identify and eliminate malware threats promptly.
Implemented robust malware prevention measures to safeguard websites from potential security breaches.

Senior Web Developer

Kaiser Permanente · 2017 - 2018

Implemented Web Development and UX design, covering 100% front to back. Ensured the smooth implementation of all copy, images, and content for website projects.
Created CSS Animations to enhance website aesthetics and improve user engagement.
Acted as the Client Liaison for KPMMC to ensure effective communication between teams.

Web Developer / Producer

Bio-Rad Laboratories · 2011 - 2015

Led Web and UX development initiatives, enhancing user experience and interface design.
Managed content for thousands of product pages, literature, videos, and software updates in multiple languages sourced from diverse regions.
Revamped and consulted on CSS and SASS styles to improve the visual aesthetics and user experience.
Administered content management systems for efficient content organization and delivery.
Implemented Salesforce tracking across all content as per the Product Manager's requirements.
Optimized and resized images provided by clients to ensure optimal performance and visual appeal for products and content.

Senior Web Producer

AllBusiness / Dun & Bradstreet · 2006 - 2010

Created and maintained CSS files for CMS components and raw HTML elements.
Led the creation of X/HTML for engineering teams to transform into CMS components used by all employees.
Developed and managed CMS components for seamless site-wide integration.
Served as a team leader, overseeing resources and responsibilities, including task delegation to associate producers, scheduling of publishing to live sites, and training on the proprietary CMS.
Proficiently edited image compositions in Photoshop based on designer-supplied files and applied CSS changes to achieve desired design alterations.
Edited XML files to facilitate their use with Flash documents, ensuring optimal functionality.
Assisted in the maintenance of SEO standards across the entire website to enhance search engine visibility and performance.
